Subject: Tip Leakage

Hello Dave,

As you no doubt know, James Nelson has been visiting us here in Rugby the last few days for a design review of the HP retrofit for Intermountain Generating Station.

This morning James mentioned that you (or was it your colleague Gary Christiansen ?) had some kind of schedule of tip leakage flows for your existing machine from GE and that you would like the same information from us.

James wasn't very clear exactly what it was you wanted but, while we don't normally supply details of tip leakage flows, if you can send us a copy of what you have then we can see if its possible to provide equivalent information for the retrofit HP.

Best Regards,
Phill.
